SUMMARY

Electrical and Information Engineering graduate specializing in software engineering, with a keen interest in web development and agentic AI application development. Adept at taking on responsibilities, passionate about learning new stacks, and committed to contributing effectively to team goals.

EDUCATION

University of Ruhuna, Galle, Sri Lanka

March 2020 – March 2025

BSc. Eng (Hons) in Electrical and Information Engineering — Second Class Upper Division (GPA 3.46)

EXPERIENCE

Global Wavenet International (Pvt) Ltd

Nov 2024 – Present

Associate Software Engineer

Apr 2025 – Present

- Developing a workforce management application for call center operations, covering full stack developments
- Built five voice AI agents for call center automation for large scale telecommunication company in Colombia
- Contributed to the front-end migration of the Compose project from Angular 7 to React
- Built AI agents for Agentic Campaign Manager, which orchestrates three specialized agents behind a supervisor agent for campaign creation, segmentation, and natural-language database retrieval
- Delivered AI-Troubleshooter v2.0 with agentic enhanced AI features and a redesigned UI, plus AI-Ops as an Electron.js desktop application with an OCLIF companion CLI

Software Engineering Intern

Nov 2024 – Apr 2025

- Built AI-Troubleshooter v1.0 and InsightDB v1.0, two agentic AI web applications for operations engineers, and conducted R&D on AI agents and the Model Context Protocol (MCP) that informed later production work. Gained end-to-end delivery experience from product deployment on local servers.
- Fixed bugs in existing products like Prime and Campaign Manager and engaged in load testing.

Department of Electrical and Information Engineering, FOE, UOR

Jan 2024 – Jan 2025

Student Instructor

Galle, Sri Lanka

- Conducted laboratory sessions on electrical and electronic modules for first- and second-year undergraduates

Lightway IT (Pvt) Ltd

Sep 2023 – Jan 2024

Software Engineering Intern

Remote

- Developed a RAG-based customer assistance chatbot using LangChain and OpenAI GPT, reducing response time and improving customer satisfaction and Integrated the chat application into Meta WhatsApp, Instagram, Facebook, and Telegram webhooks with a REST endpoint on AWS Lambda, and built the management backend using Express.js and Node.js with DynamoDB and MySQL

RELEVANT COURSEWORK

- | | | | |
|----------------------------------|-------------------------------|--|--|
| • Data Structures and Algorithms | • Software Project | • Operating Systems Programming | • Machine Learning |
| • Database Systems | • Embedded Systems Design | • Computer Vision and Image Processing | • Object-Oriented Design Patterns and Principles |
| • Computer Architecture | • GUI Programming | | • Artificial Intelligence |
| • Computer Networks | • Web Application Development | | • Software Architecture |

SKILLS

Languages: JavaScript, TypeScript, Python, Java, C, C++, SQL, Erlang

Web Development: HTML, CSS, React, Next.js, ShadCN, Bootstrap, MERN stack (MongoDB, Express.js, React.js, Node.js), Java Spring Boot, Python Flask, Python FastAPI, JEE, Angular, Electron.js, Jest

AI/ML: LangChain, LangGraph, Google ADK, Model Context Protocol (MCP), Agentic AI, RAG, LLMs, Anthropic Claude, OpenAI API, OpenAI Assistant API, Ollama, NVIDIA AI models, Azure AI Search, Generative AI, Machine Learning, Deep Learning

Databases: MySQL, PostgreSQL, MongoDB, DynamoDB, vector databases

APIs: REST, WebSocket, Server-Sent Events (SSE)

Mobile App Development: Flutter, Dart

Cloud & DevOps: AWS (Lambda, S3, CloudWatch, DynamoDB), DigitalOcean, fundamental knowledge of Azure, Linux, Docker, Nginx, PM2, Nexus

Developer Tools: Windsurf, Claude Code, VS Code, IntelliJ IDEA, Android Studio, Ubuntu VMs, Keycloak, OCLIF, GitHub, Bitbucket

Project Management Tools: Jira (Kanban, Agile methodology)

Soft Skills: Leadership, Communication, Teamwork, Time Management, Critical Thinking, Problem Solving

INDUSTRY PROJECTS

Sense AI | *AI Agent Development, Full Stack Developments*

May 2026 – Present

- Developed five AI agent applications to replace human voice agents in call centers
- Contributed to call center management application development and bug fixes in the Workforce Management System
- Tech stack and tools: Python FastAPI, Google ADK, React, MySQL, HTML, CSS, IVR systems, Claude Code

Compose | *Front-End Development*

December 2025 – April 2026

- Rebuilt the front end of the Compose project in React, migrating from an existing Angular 7 implementation
- Tech stack and tools: React, Ant Design, REST API integration, Windsurf

Agentic Campaign Manager | *Agentic AI, Front-End Development*

October 2025 – December 2025

- Developed three agents covering campaign creation, segment creation, and data visualization with database retrieval
- Integrated these agents through a supervisor agent to handle form filling, campaign creation, segment creation, and database interaction
- Built a new UI using React and ShadCN and connected the agents to the front end through a Flask backend
- Tech stack: React, ShadCN, LangGraph, Anthropic AI

Troubleshooter | *AI-Integrated Web Application*

Jan 2025 – July 2025

- Troubleshooter is an agentic AI-based web application for operations engineers that focuses on resolving customer level 1 and level 2 tickets and processing Zabbix alerts, helping the operations team resolve deployment-related issues
- Contributed to front-end development with React, backend development with Express, authentication using Keycloak, database integration, and AI integration, and deployed the application on a local server via Nginx and PM2, and later with Docker
- Demonstrated the product to more than five large-scale companies; it is currently used by the internal operations team
- Tech stack: React, Keycloak, WebSocket, Xterm, SSH, Node.js, Express, MongoDB, PostgreSQL, Anthropic AI API, LangGraph, LangChain, Azure Search, Bitbucket, Docker, Nginx

InsightDB | *AI-Integrated Web Application*

Jan 2025 – May 2025

- InsightDB is an AI agent that queries databases using natural language; contributed to full-stack development, AI integration using LangChain, and deployment
- Tech stack: React, Keycloak, WebSocket, Node.js, Express, MongoDB, PostgreSQL, Anthropic API, LangChain, RAG, Bitbucket, MySQL, Linux, Nginx, local server deployment

ACADEMIC PROJECTS

Tea Leaf Disease Detection via Machine Learning | *ML, DL, Flutter, Hugging Face, Python Flask, R&D*

Jan 2024 – Nov 2024

- Final year research project — published and presented at the APITT International Conference 2024
- Applied machine learning and deep learning algorithms to classify diseases into distinct classes using a novel dataset collected for the project, with the deep learning model deployed on Hugging Face
- Developed the mobile application front end using Flutter and the backend using Flask
- Deployed the backend on Google Cloud Platform
- Responsible for implementing the machine learning and deep learning models, user authentication, UI/UX design for the mobile application, image preprocessing, and backend function development using Flask

Fuel Management System | *Java Spring Boot, Microservices, Flutter, REST API*

Aug 2024 – Nov 2024

- Developed four web portals and one mobile application to manage the fuel quota allocated to each vehicle, similar to the system used in Sri Lanka during the pandemic
- Responsible for developing the mobile application and its related microservices, along with inter-service communication

Web-Based Application for Entering Final Year Project Marks | *MERN Stack, REST API*

Jan 2023 – Sept 2023

- Created a web application for entering final year project marks for the Department of Electrical and Information Engineering
- Helped build user authentication and implemented all CRUD operations for the dynamically changing evaluation forms, one of the project's core features

CERTIFICATIONS AND BADGES

Microsoft Learn: Cloud Skills Challenge — Azure Fundamentals (AZ-900)

HackerRank Badges: C++ Silver Badge, Java Silver Badge

LinkedIn Learning: AWS Exam Prep, Learning Ansible, Learning Kubernetes, MERN Essential Training

Sololearn: C, Introduction to C++, Introduction to HTML, Introduction to JavaScript, Python for Beginners

Great Learning: Serverless Computing

Simplilearn: Generative AI

LEADERSHIP AND EXTRACURRICULAR ACTIVITIES

Blog Article Writing: Chatbot Development with the OpenAI Assistant API: A Step-by-Step Guide

Sports: Faculty team player in volleyball, elle, and cricket, with school-level sports achievements

Leadership: First-year assistant girls' batch representative, public relations officer of IEEE ComSoc, and girls' sports captain

Clubs: Student member of IESL, Gaveshakayo, CEDS, and the LEO Club
